

Milkklik™

Milkklik™ is a product designed for cows and buffalos. We have two different versions as Milkklik™ Cow and Milkklik™ Buffalo. Contains are mainly same in both the products but have different potencies and strength. This product is mainly designed for maintaining the overall health and to increase the resistance power of cattle. It is found that most of cattle get ill due to lack of deficiencies in them, which also reduces their internal resistance power, which reduces the milk yield, further makes farmers to invest more on medicines, making loss in business. Hence, we at Nanosolutions™ have come with a unique product which has most of the minerals, vitamins & amino acids present in our product, helping the cattle to regain its health
